

ASSOCIATE: INTERNATIONAL LUNAR OBSERVATORY QUESTIONNAIRE

Dear Prospective ILO Associate:

The International Lunar Observatory (ILO) is a low-cost, fast-turnaround, multi-wavelength space astronomy mission intended to land in the South Pole Region of the Moon by the 2008 Olympics. The ILO is envisioned as the first step toward human lunar base build-out leading to a permanent human presence on the Moon, and is intended to be as international an effort as possible. Exact landing location, wavelength spectrum, spacecraft configuration, and potential financiers, users and supporters will be determined through the ILO Advisory Committee Workshop on Hawai'i Island, November 17-20, 2005.

More information on the ILO can be found at: www.spaceagepub.com/ilo/ilo.home.html.

Presently, the ILO Advisory Committee (AC), formed by Space Age Publishing Company of Hawaii and California in 2004-5, is seeking Associates who would like to support and help realize the ILO mission. As an ILO Associate, you will receive regular updates on mission progress and may have the opportunity to participate in special events, such as the ILO AC Workshop. More importantly, you will become affiliated with this pioneering and possibly transforming lunar astronomy mission.

If you are interested in becoming an ILO Associate, please fill out this questionnaire and return bottom portion to:

We will contact you when appropriate.

Space Age Publishing Company
65-1230 Mamalahoa Hwy, Suite D-20
Kamuela, Hawai'i 96743 USA
